

# 3 PROFESSIONAL SERVICE

No Long-Term Contracts

Emerald Coast Odor Control is the areas leading odor control specialists. After a complete investigation, of the target facility, we can design and install a system that will provide comprehensive odor control. Our technician can customize a system that will meet the demands of the largest of facilities while meeting a cost-effective budget.

For pennies a month our technician can help ensure that your location maintains a pleasant, odor-free environment. There are no hidden charges, no up-front fees and no long-term binding contracts. Emerald Coast Odor Control provides odor- eliminating solutions that will make you breath easy.

# EMERALD COAST ODOR CONTROL

## About Our Firm

### Professional Odor Control Services

Emerald Coast Odor Control provides comprehensive odor neutralizing solutions for any size business or industry from the Florida Panhandle to the Gulf Coast of Mississippi. With 24 years of industrial waste experience, we are the regions number one trusted odor control specialists.

Nuisance odors caused by airborne gases and particulate pose a significant problem for commercial, municipal, manufacturing and industrial operators. Conventional approaches, such as diverting odorous gases using high power fans, or the use of localized deodorizing agents, are less than effective and often pose associated health and safety issues for on-site personnel and customers.

Emerald Coast Odor Control utilizes proprietary AirStreme™ misting systems and formulations to neutralize all odors at their source — through a combination of perimeter and directed spray atomization. This cost-effective strategy not only improves on-site working conditions and worker safety, but also has been found to greatly reduce the frequency of odor complaints from customers, employees, surrounding residents and businesses.

## 1 LOCALIZED ODOR SOLUTIONS

### Compact Fan Dispensing System

The AirStreme Fan Dispenser features a maintenance-free, one-piece unit designed to keep problem areas odor-free 24 hours a day. Each unit contains a specially designed, battery-operated fan that will continuously draw and distribute airSolution odor control formulation from a liquid or gel cartridge - infusing odor eliminating molecules into the air.

Combined with an airSolution gel or liquid replacement cartridge, the unit effectively eliminates odors from 1,000 to 4,000 square feet depending upon the location. When the airSolution cartridge is empty, the cartridge is easily replaced, along with the D-cell battery, to provide up to 30 more days of odor control. The AirStreme Fan Dispenser is ideal for any small odorous area.

### SAMPLE FAN DISPENSING APPLICATIONS

Washrooms	Office Buildings	Office Buildings
Lunch Rooms	Waiting Rooms	Luxury Boats
Sick Rooms	Break Areas	Retail Stores
Holding Tanks	Residential Homes	RV Vehicles
Locker Rooms	Business Entrances	Smoking Areas

## 2 INDUSTRIAL ODOR SOLUTIONS

### LCU Industrial Atomizing System

The HLS-ECOLO LCU atomizing unit is specifically designed to simultaneously control multiple SU misting satellites installed in varying locations across a large facility. The LCU control unit and SU misting satellites are custom installed and uniquely configured for each location. The LCU control unit features automatic operation, a lockable rustproof fiberglass cabinet and requires virtually no maintenance.

LCU satellites come in a variety of capacities and are mounted in problem areas as determined by our professional installer. The LCU atomizing system is the most effective odor control solution for facilities of any size.

### SAMPLE LCU ATOMIZER APPLICATIONS

Loading Docks	Restaurants	Hospitals
Nursing Homes	Waste Treatment	Shopping Centers
Recycling Plants	Food Processing	Packing Plants
Exhaust Stacks	Chemical Plants	Condominiums
HVAC Systems	Office Complexes	Garbage Areas
